SAGE Wildfire  
Observations

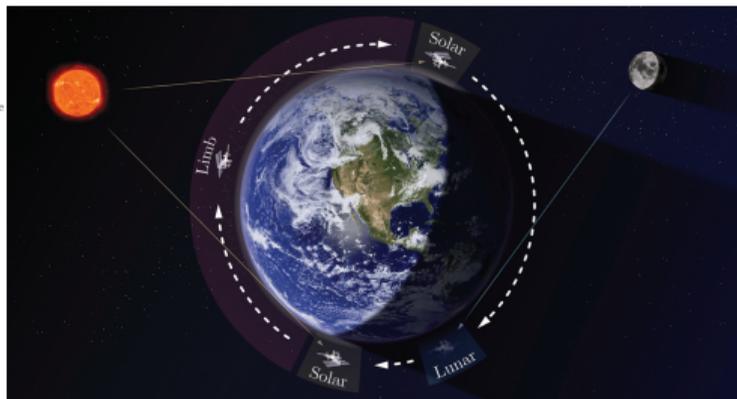

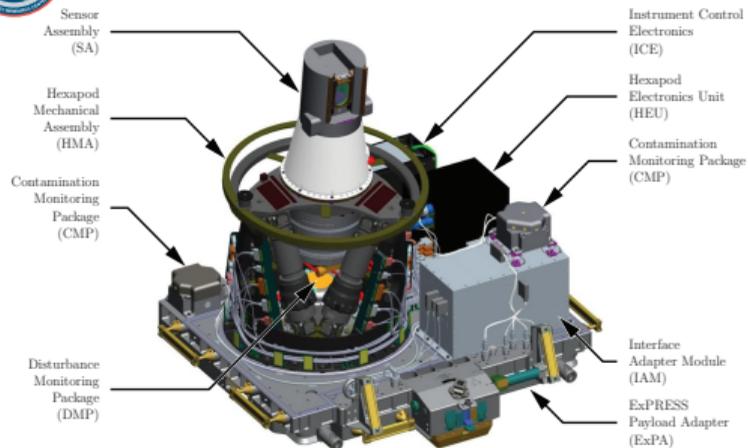

Satellite  
Aerosol/Ozone

Conclusion

Questions

# SAGE III ISS Overview

- ▶ Stratospheric Aerosol and Gas Experiment III (SAGE III) is an external payload that was launched on SpaceX CRS-10 on 19 February 2017 and robotically installed on ELC-4.
- ▶ 67 profiles within 1000 km of Boulder, 18 within 500 km, and 9 within 500 km and 2° latitude as of 31 March 2018.

## SAGE III ISS Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

Questions

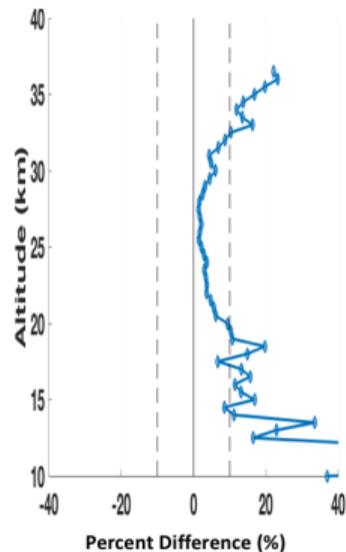

# NDACC/SAGE Comparisons — Ozone

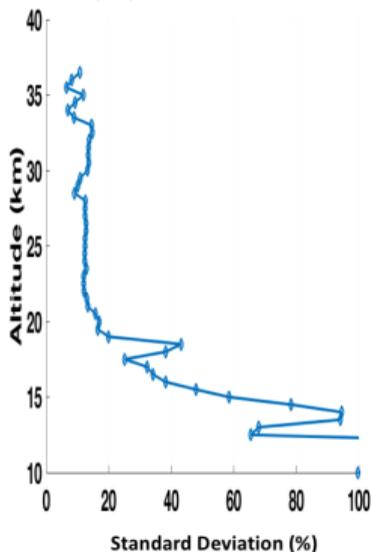

## SAGE III Matched to NDACC Ozonesondes

Ozone Mean Percent Difference

Ozone Std Dev of Percent Difference

Lat Difference Max 5 Degrees  
 Lon Difference Max 15 Degrees  
 Time Difference Max 24 hours  
 NOTE: SAGE III/ISS Solar Events Only

57 Matches total:		
Hohenpeissenberg	(48N, 11E)	31
Lauder	(45S, 170E)	5
Reunion, St Denis	(22S, 56E)	3
OHP	(44N, 6E)	2
Payerne	(47N, 7E)	13
Dumont d'Urville	(67S, 140E)	3

See Susan Kizer, "Validation of the Stratospheric Aerosol and Gas Experiment III on the International Space Station (SAGE III/ISS) Science Data Ozone Product: Preliminary Results," P-51 at the Poster Session.

SAGE Overview

NDACC  
 Contributions

SAGE Wildfire  
 Observations

Satellite  
 Aerosol/Ozone

Conclusion

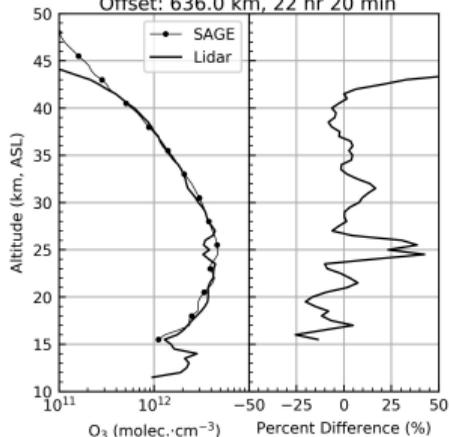

Questions

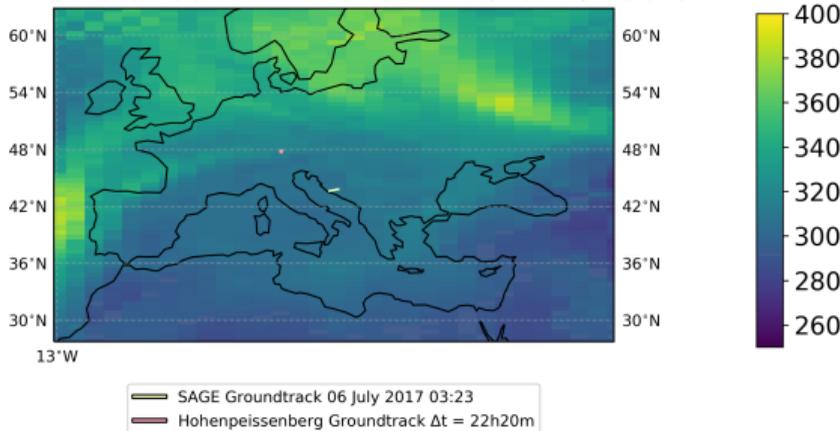

# NDACC/SAGE Comparisons — Ozone

Hohenpeissenberg Aerosol O<sub>3</sub>: 2017-07-06 03:23 UTC  
Offset: 636.0 km, 22 hr 20 min

### OMPS Total Column Ozone with Groundtracks

See Travis Knepp, “Validation of the Stratospheric Aerosol and Gas Experiment-III (SAGE-III) Aerosol Data Product,” P-50 at the Poster Session.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

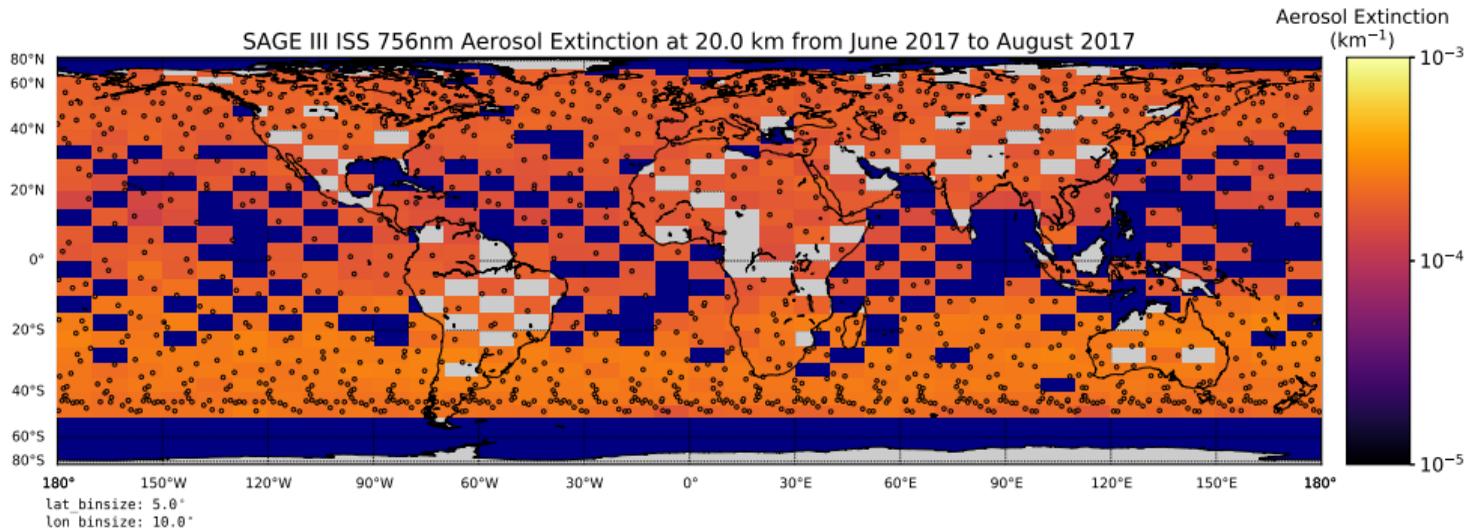

Questions

# Pacific Northwest Wildfires/PyroCb

Before

- ▶ Uniform stratospheric aerosol layer before summer wildfires.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

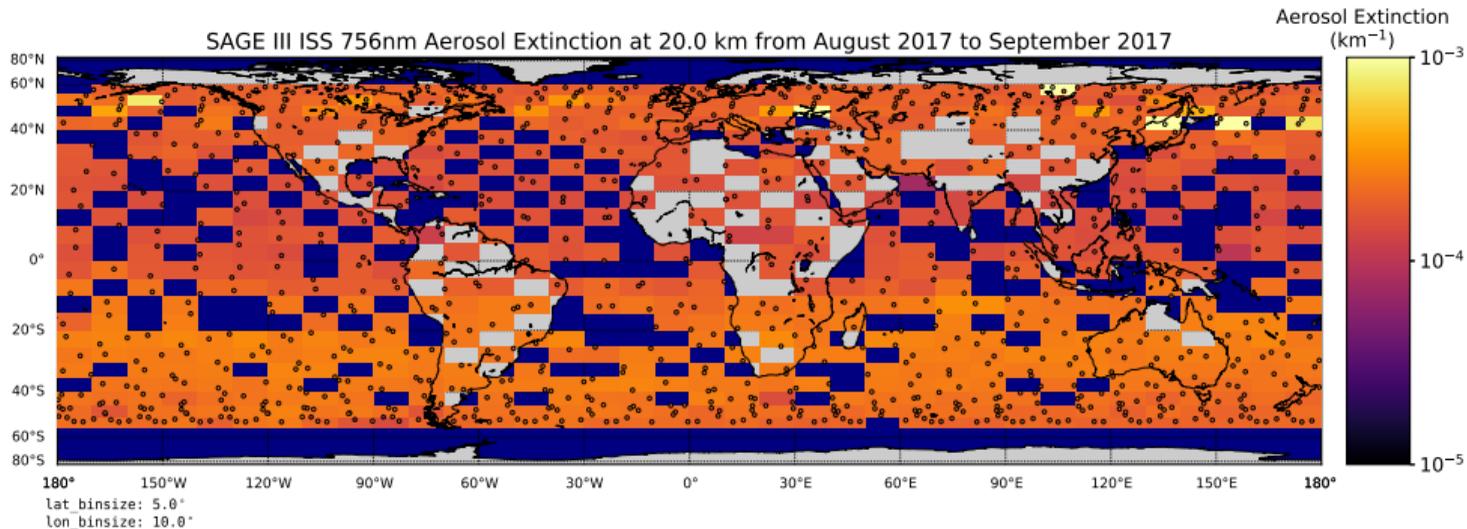

Questions

# Pacific Northwest Wildfires/PyroCb

## Concurrent

- ▶ Sparse observations of up to 10× increase of aerosol extinction in layer.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

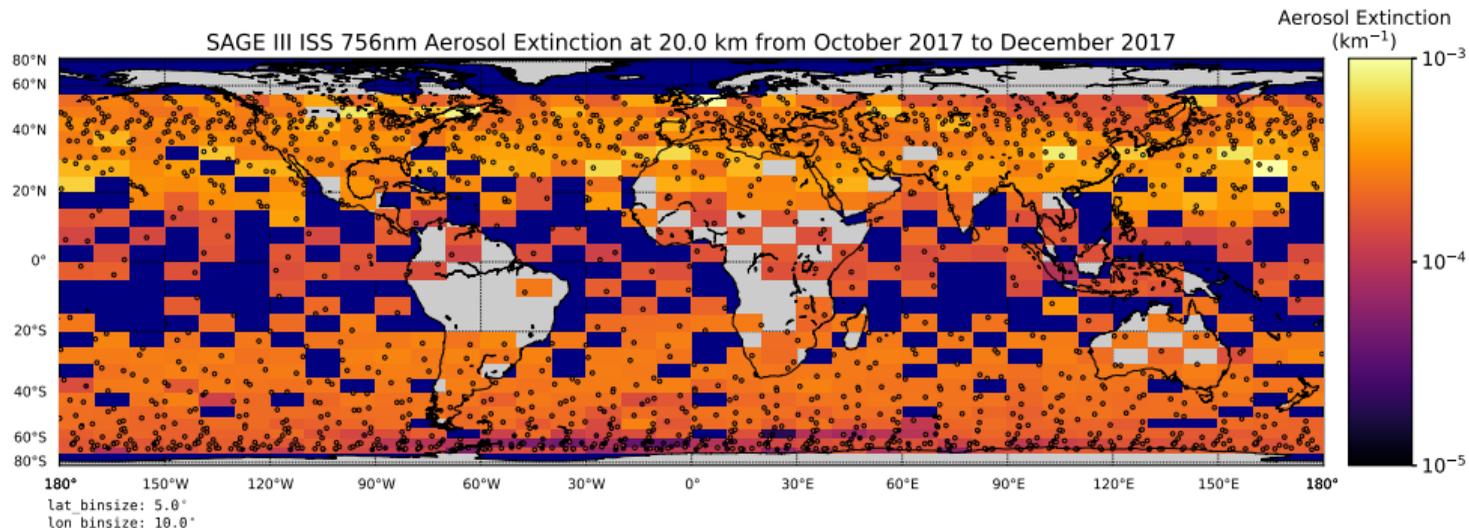

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

Questions

## After

- ▶ Aerosol dispersed through Northern latitudes after fires ceased.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

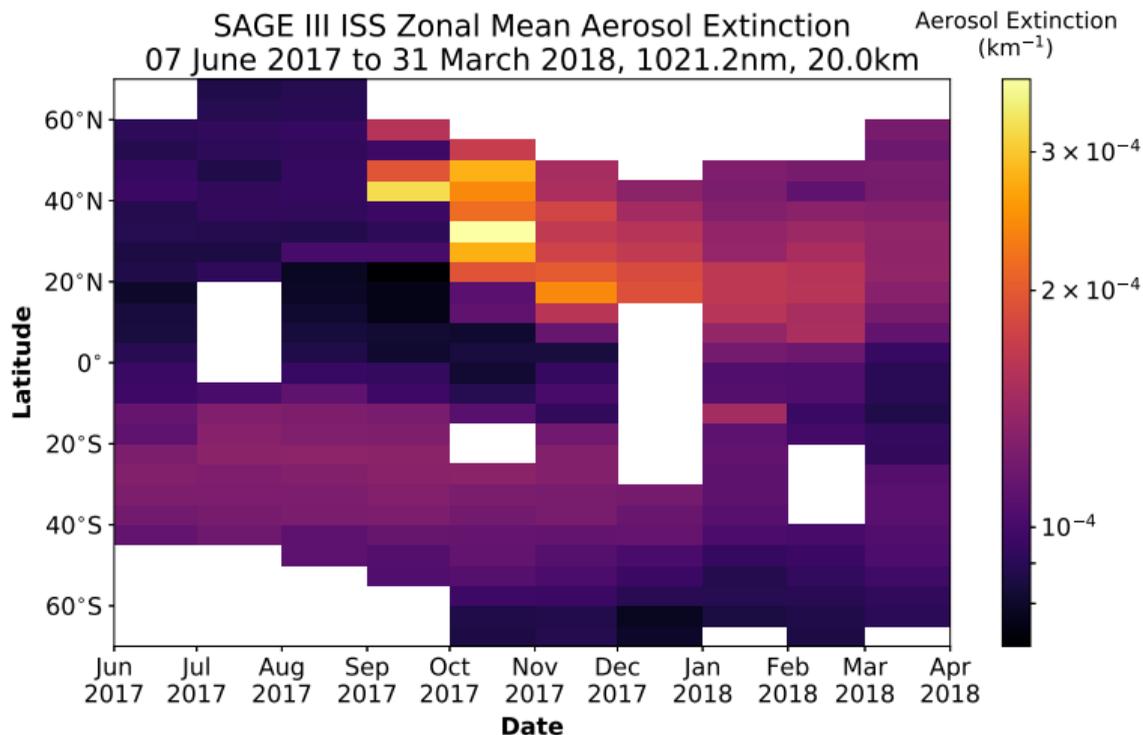

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Zonal Mean Aerosol Extinction

- ▶ Clear injection of aerosols into stratosphere with latitudinal dispersion.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

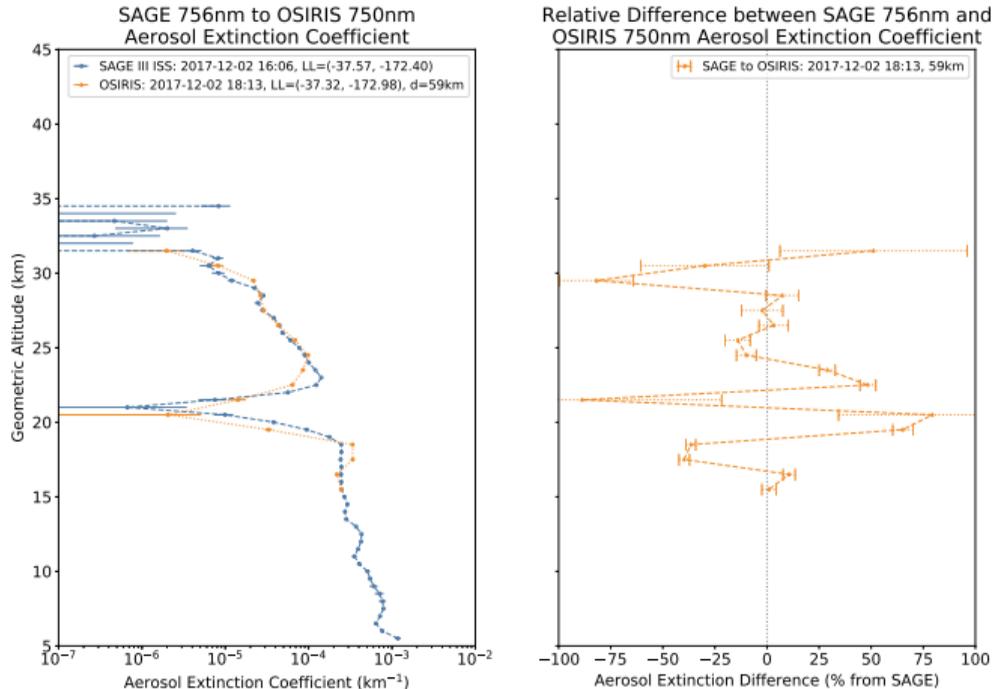

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Aerosol Validation — OSIRIS. Co-Located

- ▶ Independent, nearly concurrent observations of an effectively aerosol-free layer in the stratosphere.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

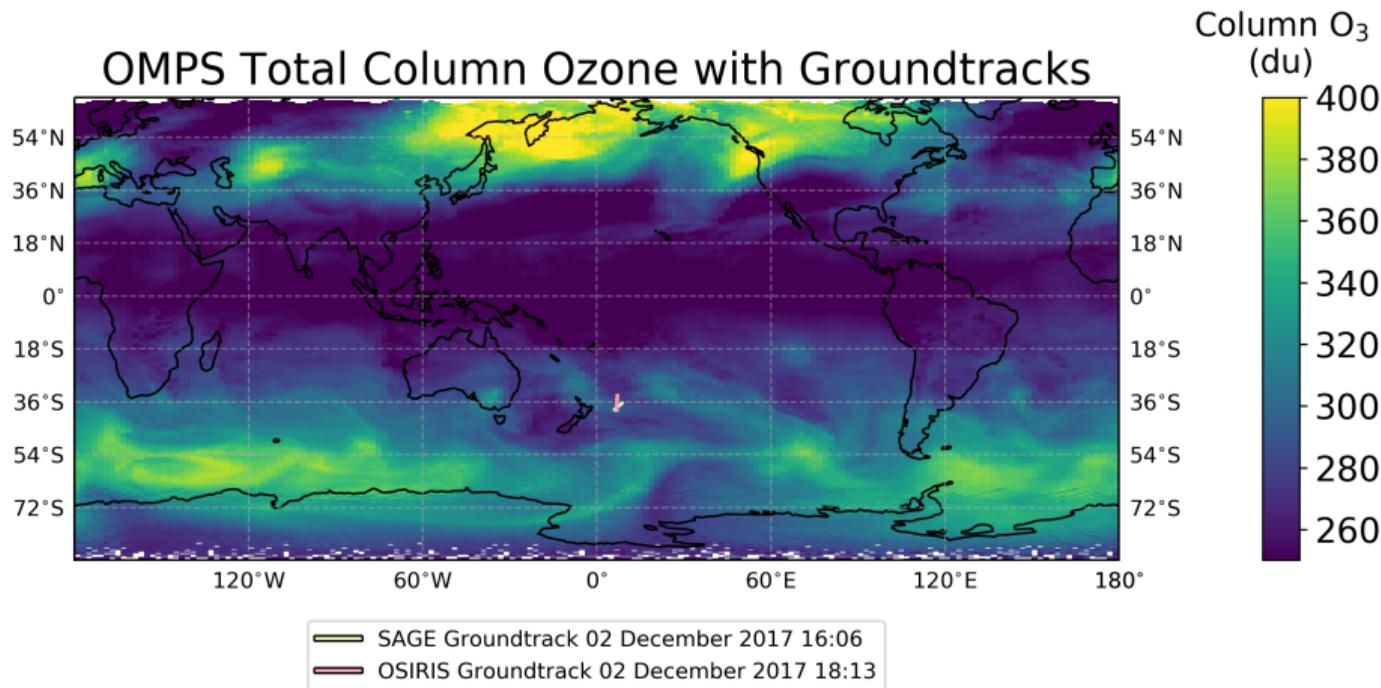

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Aerosol Validation — Groundtracks, OMPS O<sub>3</sub>

► Profiles intersect “Clean” filament to North.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

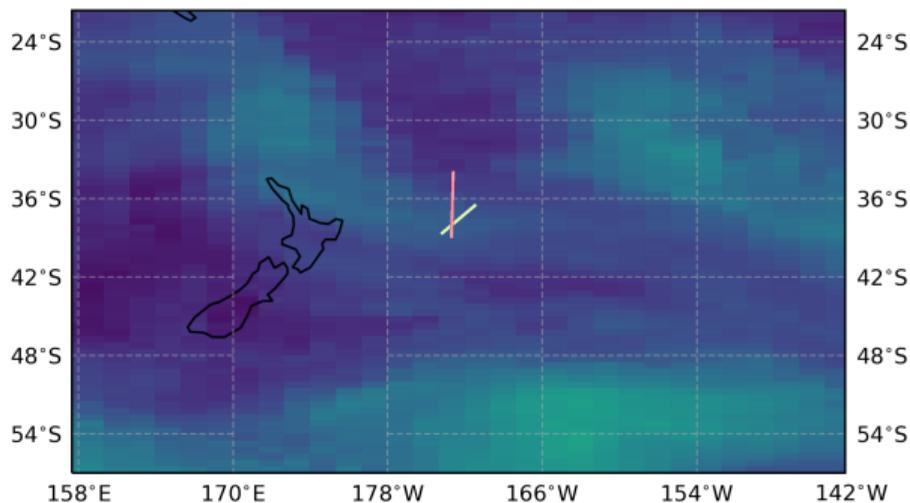

Questions

# Aerosol Validation — Groundtracks, OMPS O<sub>3</sub>

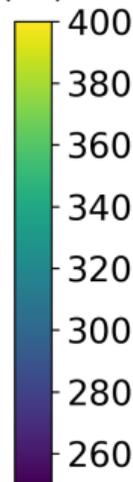

## OMPS Total Column Ozone with Groundtracks

— SAGE Groundtrack 02 December 2017 16:06  
— OSIRIS Groundtrack 02 December 2017 18:13

Column O<sub>3</sub>  
(du)

► Profiles intersect “Clean” filament to North.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

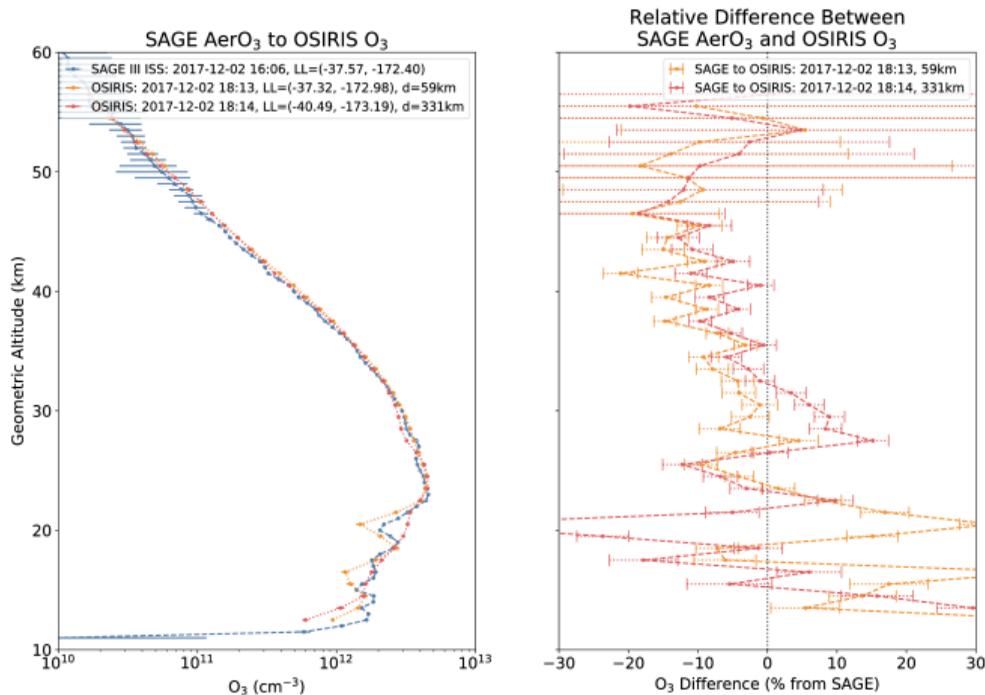

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Ozone Validation — OSIRIS

- ▶ Layer not present in the following OSIRIS profile to the Southwest.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

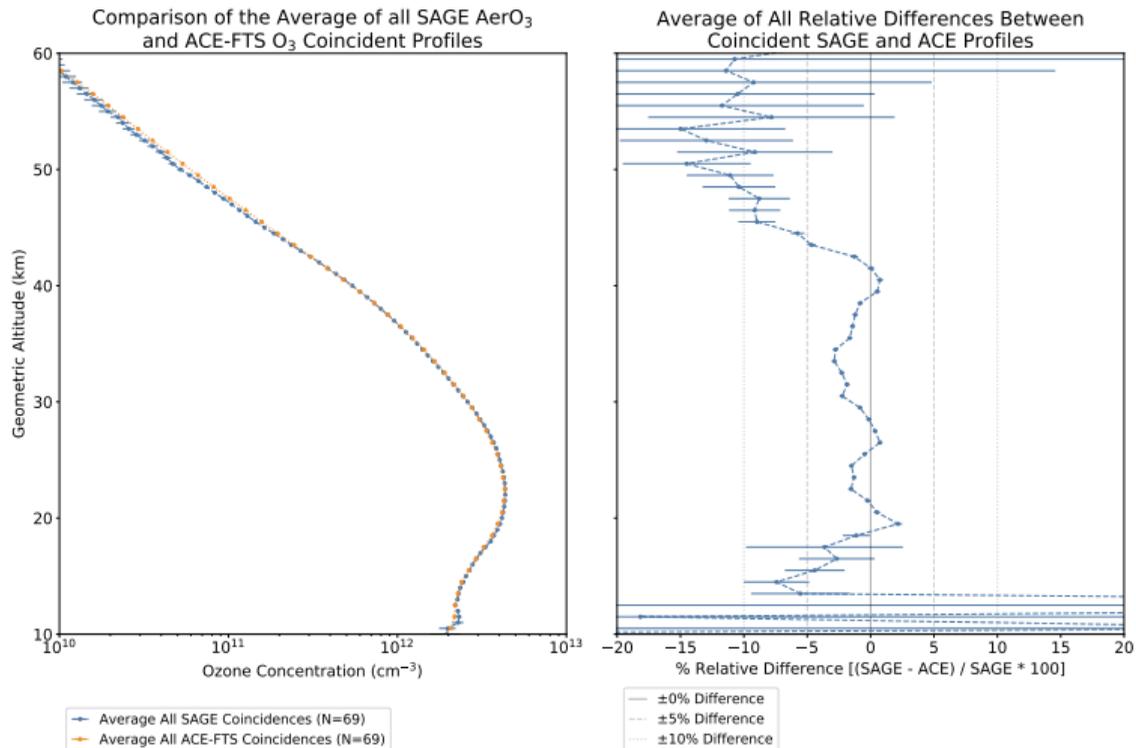

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Ozone Validation — ACE-FTS

- ▶ SAGE and ACE compare to within 5% for most of the stratosphere.

SAGE III ISS  
Global Perspective

Kevin Leavor

SAGE Overview

NDACC  
Contributions

SAGE Wildfire  
Observations

Satellite  
Aerosol/Ozone

Conclusion

Questions

# Conclusions

- ▶ GMD offers significant opportunities for collaborative research and validation.
- ▶ NDACC ozonesondes and lidar already play a crucial role in validation and explanatory efforts.
- ▶ SAGE III ISS's first year has shown tremendous promise for the new instrument.
- ▶ Both ground and satellite coincident observations will be crucial in future data releases.
