

THE TRIALS AND TRIUMPHS OF SHADOZ (SOUTHERN HEMISPHERE ADDITIONAL OZONE SONDES):

THE WHO'S WHO OF TROPICAL OZONE PROFILES

Jacquie Witte (NASA/GSFC, SSAI)
Anne Thompson (NASA/GSFC)
Bryan Johnson (NOAA/GMD)
Samuel Oltmans (NOAA/GMD)
Patrick Cullis (NOAA/GMD, CIRES)
Chance Sterling (NOAA/GMD, CIRES)
Allen Jordan (NOAA/GMD, CIRES)
Herman Smit (FZ-Juelich, Germany)

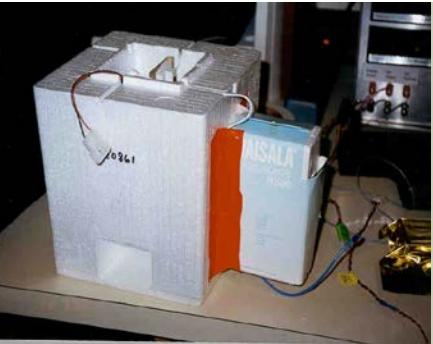

ROADMAP

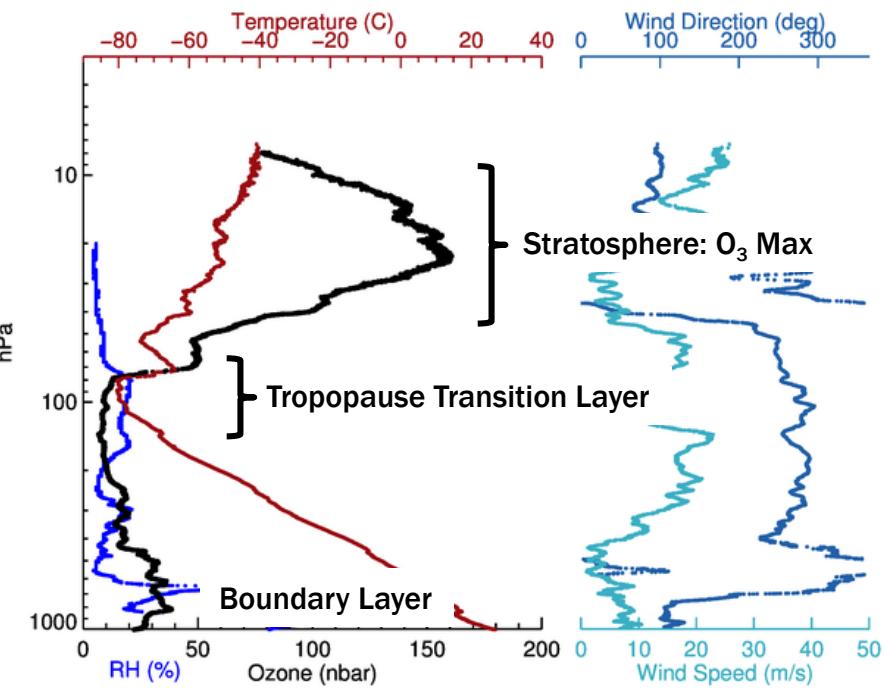

- Ozonesondes – why they are awesome!
- (1) Reprocessing in a nutshell
 - Witte et al., JGR, doi:10.1002/2016JD026403 [2017]
 - Sterling et al., AMT, doi:10.5194/amt-2017-397 [2018]
- (2) Evaluation highlight
 - Thompson et al., JGR, doi:10.1002/2017jd027406 , [2017]
 - Thompson et al., BAMS, submitted, [2018]
- (3) Uncertainty highlight
 - Witte et al., JGR, doi:10.1002/2017JD027791, [2018]
- Recap

ELECTROCHEMICAL CONCENTRATION CELL (ECC) OZONESONDES

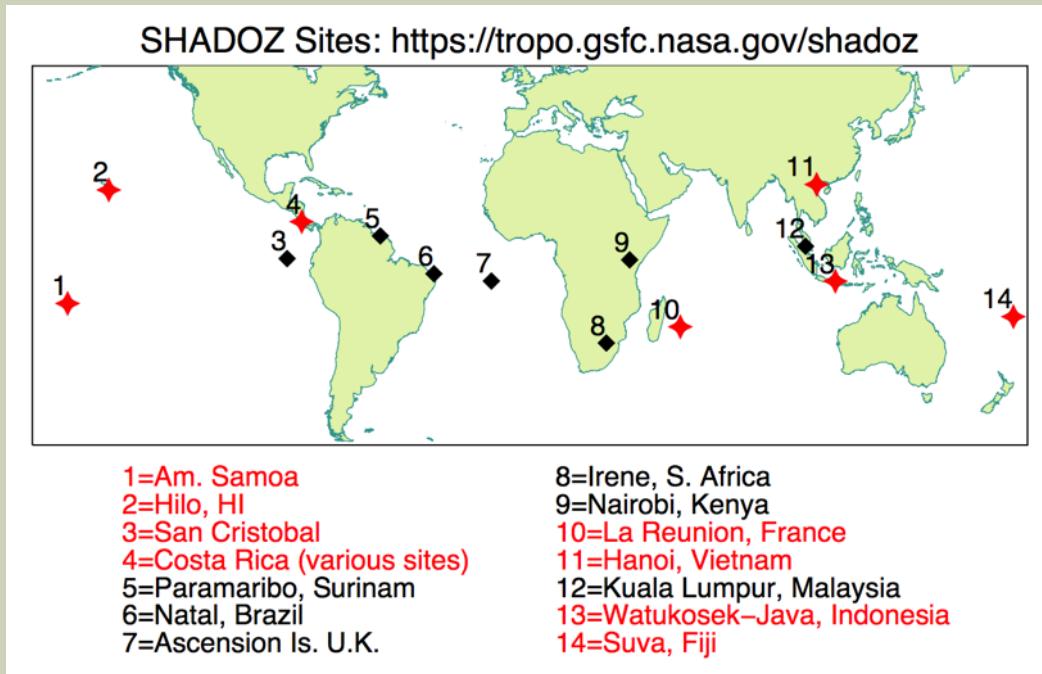

/NASA/GSFC/SHADOZ Archive
Station: Ascension Is., U.K. (7.56S, 14.22W)
Launch Date: 17 May, 2017 12:49 UT

- High vertical resolution from the surface to 35km
- Easy to operate
- Launch anywhere, anytime

(1) REPROCESSING SHADOZ DATA RECORDS

★ = NOAA supported stations (50% of SHADOZ sites)

Since 1998 ~ 20 years of archiving.

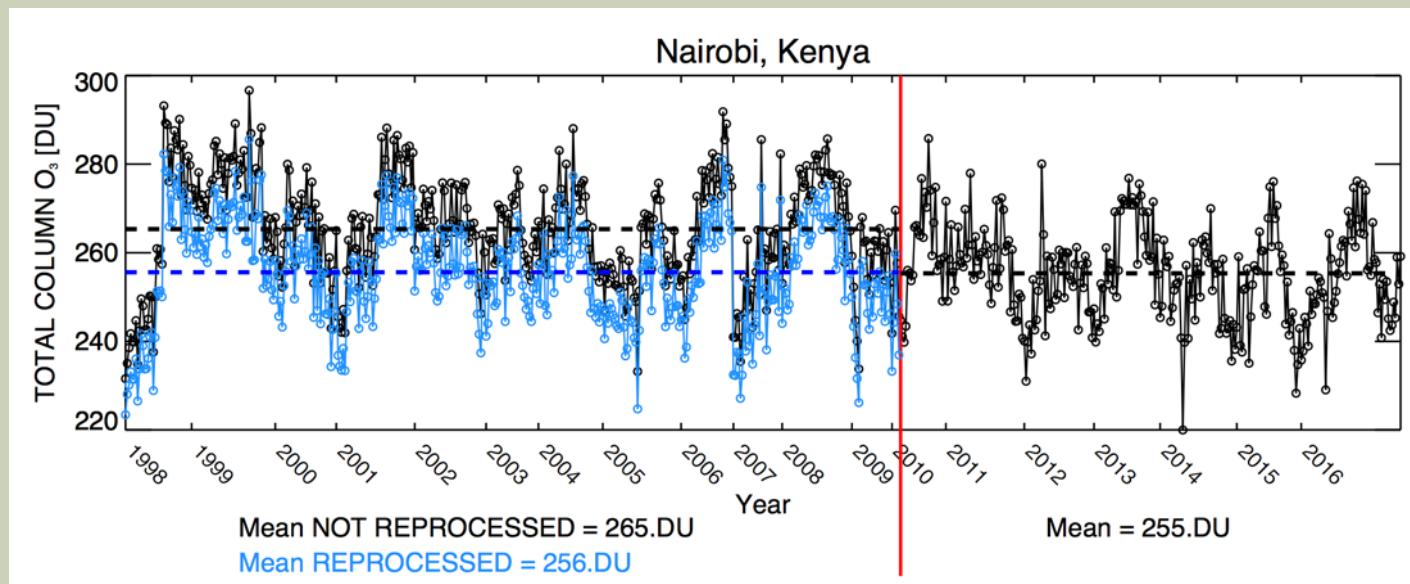

Launch at Nairobi, Kenya

Launch at Paramaribo, Surinam

WHAT ARE THE ISSUES?

- Instrumentation and operating procedures vary
 - Introduce inhomogenieties
- Reprocessing can be hampered by incomplete metadata reporting
- Non-standard solution recipes
 - One size does NOT fit all – ozone response vary

Witte et al., 2017

REPROCESSING IN A NUTSHELL

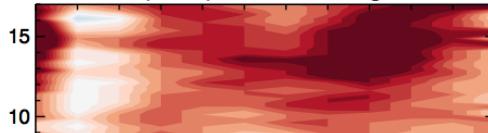

Major Impact ($> 10\%$)

1998-2016
monthly mea
annual cycle

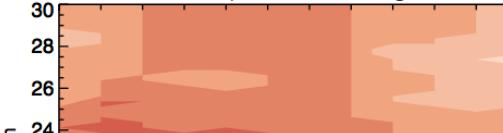

Minor Impact

Watukosek-Java(7.6S,113E)

Trop: Reprocessed-Original

Strat: Reprocessed-Original

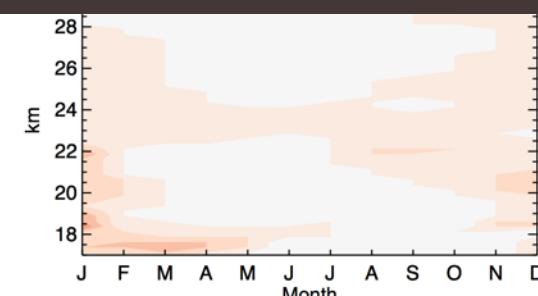

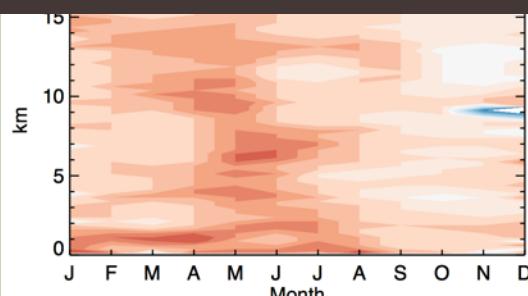

Watukosek-Java (7.6S,113E)

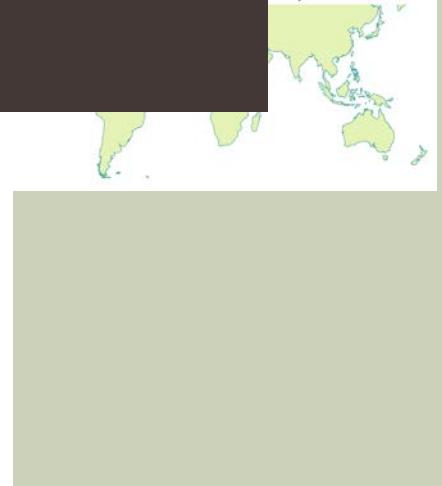

TAKE HOME

Reprocessing is not homogeneous.
It is site dependent and profile dependent.

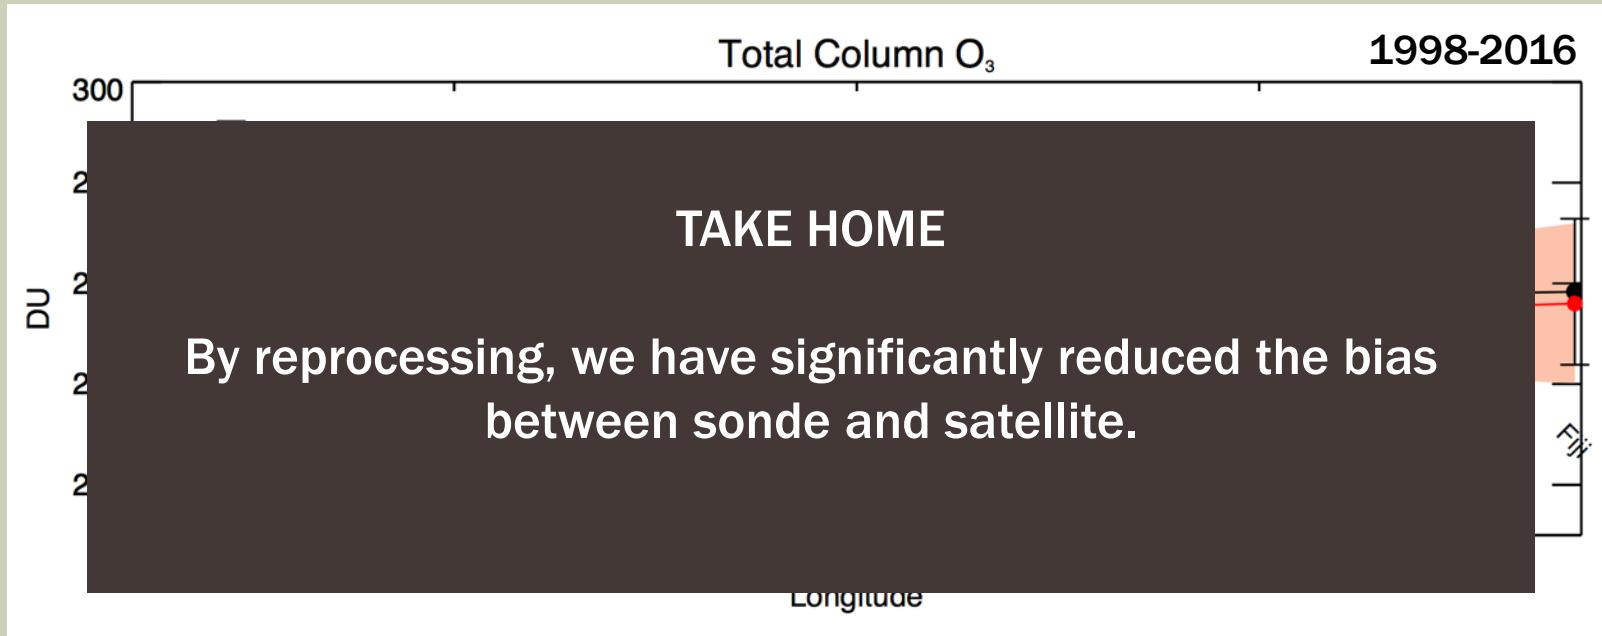

4W)

(2) EVALUATION HIGHLIGHT

12 OF 14 STATIONS ARE WITHIN 2% OF NASA AND NOAA SATELLITES (TOMS, OMI, OMPS)

Red = $\pm 1\sigma$ Sonde Black = $\pm 1\sigma$ Satellite

Thompson et al., 2017

- Reprocessing achieves up to 5% total ozone accuracy – includes independent ground-based instruments, i.e. Dobson, Brewer
- Compared with 1st SHADOZ evaluation [Thompson et al., 2003], where Satellite-Sonde offsets > 10% at half the sites

(3) UNCERTAINTY HIGHLIGHTS

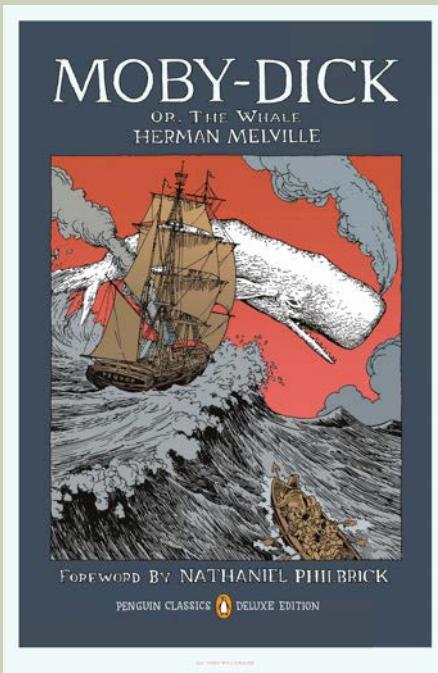

George Paiman: Paramaribo, Surinam Operator

VERTICAL OZONE PROFILE UNCERTAINTY: THE WHITE WHALE IN THE OZONESONDE COMMUNITY

■ White Whale

- “An objective that is relentlessly or obsessively pursued but difficult to achieve” – *Oxford Dictionary*

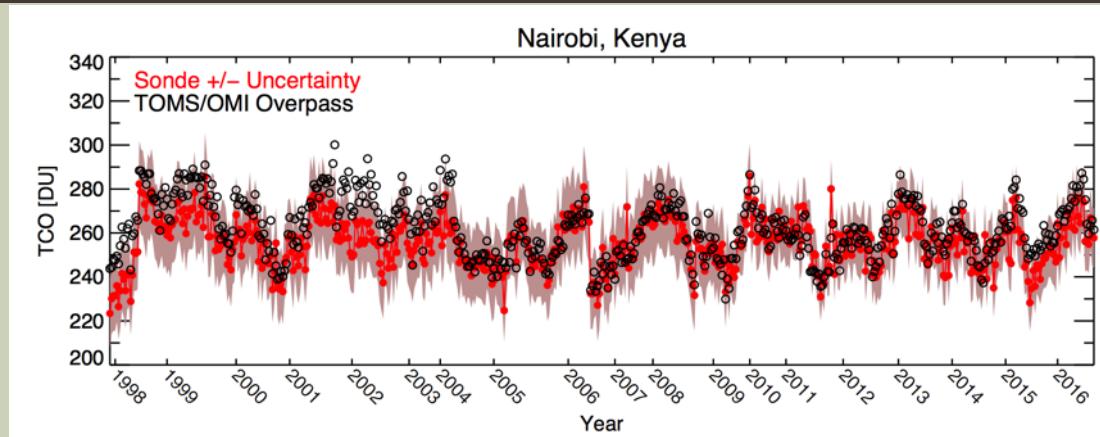

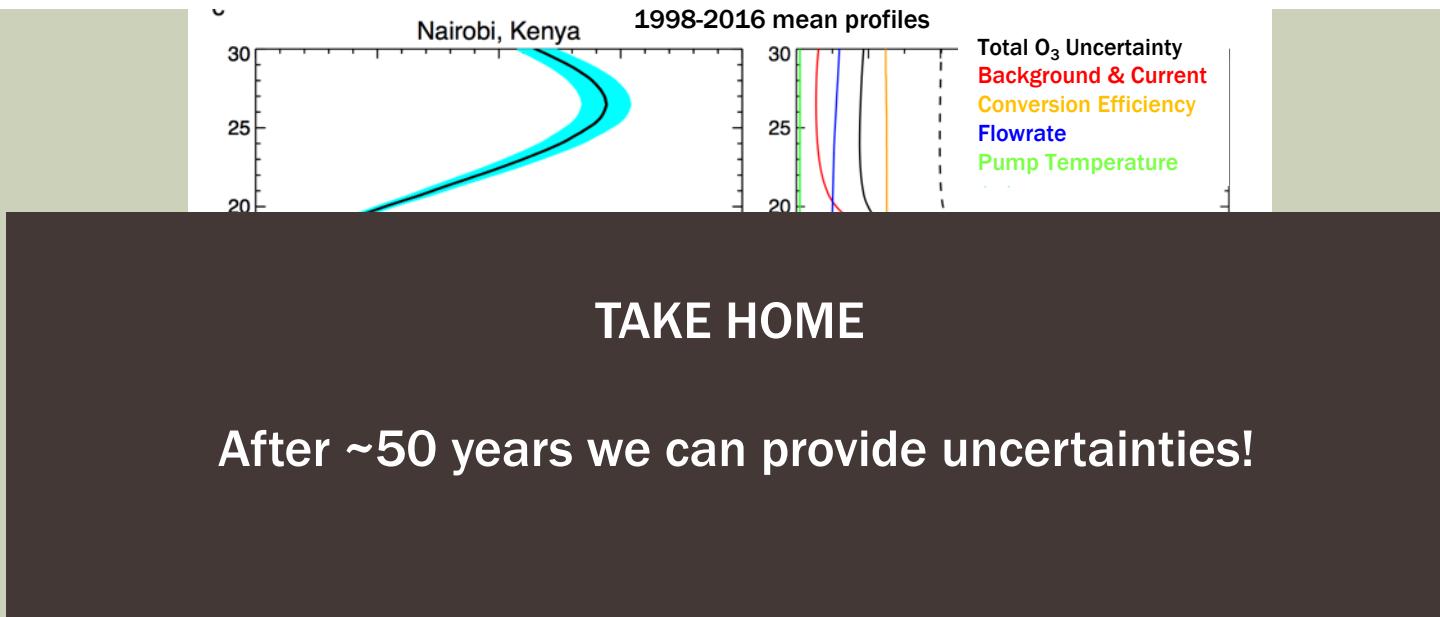

$$\frac{\Delta P_{O_3}}{P_{O_3}} = \sqrt{\frac{(\Delta I_M)^2 + (\Delta I_B)^2}{(I_M + I_B)} + \left(\frac{\Delta \eta_C}{\eta_C}\right)^2 + \left(\frac{\Delta \Phi_p}{\Phi_p}\right)^2 + \left(\frac{\Delta T_p}{T_p}\right)^2}$$

WMO/GAW #201, 2014

O_3 Uncertainty = ΔO_3 Background + ΔO_3 Current +
 Δ Conversion Efficiency +
 Δ Flowrate +
 Δ Pump Temperature +
 Δ Transfer Function

UNCERTAINTY HIGHLIGHT

Witte et al., 2018

RECAP: WHERE TO FIND THE ESSENTIAL DETAILS

1. Reprocessing

- Witte et al., JGR, doi:10.1002/2016JD026403 [2017]
- NOAA Reprocessing: Sterling et al., AMT, doi:10.5194/amt-2017-397 [2018]

2. Evaluation

- Thompson et al., JGR, doi:10.1002/2017jd027406 [2017]
- JOSIE-2017: Thompson et al., BAMS, submitted, [2018]

3. Uncertainties: Witte et al., JGR, doi:10.1002/2017JD027791 [2018]

JOSIE = JUELICH [GERMANY] OZONE SONDE INTERCOMPARISON EXPERIMENT

- Oct/Nov 2017
- Evaluate WMO operating procedures, training, test new solutions & instruments
- 8 SHADOZ operators participated, thanks to WMO/UNEP funding support
- **POSTER SESSION: P11**
- **Also see POSTER P57 (NOAA's reprocessing efforts)**
